

Accelerate your Migrations to Azure with StorageX at no additional cost!

Azure and Data Dynamics partner to provide the leading data management solution and accelerate your cloud journey at zero license cost for the migration.

Organizations that want to drive cloud digital transformation for faster innovation, business agility, and better cost-effectiveness with their data management need a simple, accurate, and repeatable way to move their data into the Azure cloud. However, cloud initiatives can have their success bottlenecked by manual processes and budget.

> Data Dynamics StorageX Migration, an offer sponsored by Microsoft Azure.

The power, versatility, and expandability of data management in Microsoft Azure is critical for customers' digital transformation journey. The first and most difficult step in that journey is migrating on-premises data into Azure. Microsoft has made the journey easier than ever before by creating the Azure File Migration Program, sponsoring the use of Data Dynamics StorageX to migrate data into Microsoft Azure at an enterprise scale without requiring customers to purchase separate migration licensing. Instead, customers can simply register their migration project information with Data Dynamics and start moving data today.

> Key Benefits

Five ways how Azure File Migration simplifies an organization's journey to the cloud:

- 1 Migration of unstructured file, Hadoop and object storage data into Azure at no additional cost to the customer
- 2 Customer data growth in Azure is applicable towards their Microsoft Azure Commit to Consume (MACC)
- 3 Automated, policy-based file data migration from heterogeneous storage resources into Microsoft Azure storage
- 4 Comprehensive Azure file storage endpoint support, including Azure Files (Premium, TX Optimized, Hot, Cool), Azure NetApp Files (Ultra, Premium, Standard), Azure Blob (Premium, Hot, Cool)
- 5 Automated access control and file security management

> Three simple steps to kickstart Azure File Migration:

STEP 01

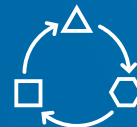

Registration of customer's migration project with Data Dynamics (including Azure Subscription ID)

STEP 02

Customer introduction to the Data Dynamics customer success team to enable the StorageX application and generate the sponsored license

STEP 03

Customer attends a 1-hour StorageX onboarding session and introduction to enhanced data management solutions for data analytics, sharing, security, and compliance

> About Data Dynamics

Data Dynamics is the leader in data democratization by providing data Analytics, Mobility, Security, and Compliance solutions to navigate the data landscape of the digital future. The insight, intelligence, and automation leveraging the Platform drive risk mitigation, enhanced data security, secure sharing of sensitive data, and storage optimization all from a single platform.

Proven in over 25% of the Fortune 100, the Data Dynamics Platform can scale to meet the requirements of global enterprise workloads. The Platform enables the adoption of hybrid, public and multi-cloud strategies, builds higher quality SLAs, and improves business process modernization.
